

<i>Carl Johan Casselgren and Anders Henricsson</i> A note on distance labeling of graphs	723
<i>Sitong Chen and Xianhua Tang</i> A comprehensive review on the existence of normalized solutions for four classes of nonlinear elliptic equations	739
<i>João Pablo Pinheiro Da Silva, Giuseppe Failla, Leszek Gasiński, and Nikolaos S. Papageorgiou</i> Anisotropic singular logistic equations	765
<i>Petr Hasil, Jiřina Šišoláková, and Michal Veselý</i> Comparison theorems for oscillation and non-oscillation of perturbed Euler type equations	785
<i>Steven G. Krantz</i> The automorphism groups of domains and the Greene–Krantz conjecture	807
<i>Mario Alberto Ruiz Caballero and Rafael del Río</i> On spectral stability for rank one singular perturbations	819
<i>Radosław Ziemann and Paweł Żyliński</i> A linear time algorithm to compute vertices that belong to all, some and no minimum dominating sets in a tree and its consequences	841
<i>Chun Li, Dimitri Mugnai, and Tai-Jin Zhao</i> Corrigendum to “Nontrivial solutions for Neumann fractional p -Laplacian problems” [Opuscula Math. 45, no. 5 (2025), 623–645]	857
