Summaries	41
-----------------	----

SIGNAL PROCESSING FOR IDENTIFICATION AND CONTROL SYSTEMS

Przemysław Korohoda	
Sensitivity Analysis for the Obtained after Optimisation Cellular Clearance of the Two-Compartmental Model	63
Przemysław Korohoda	
A Children Population Model for Verification of Bioimpedance Analysis Methods	71
Zbigniew Mikrut, Piotr Augustyniak	
Mobile System for Remote Cardilogic Inspection: Implementational and Technological Aspects	79
Tomasz Orzechowski, Katarzyna Chmurzyńska, Piotr Radkowski	
Automatic Classification of Voice Disorders Induced by Neurodegenerative Disease Based on Isolated Sounds Analyses	91
Paweł Wołoszyn	
Multiagent Approach in Cellular Chemotaxis Modelling	99
Marek Gorgoń	
Hardware-Software Environment for Acquisition, Processing and Visualization of Complex Signals Based on the Modern FPGA Devices	107
Laurent Babout	
X-Ray Tomography Imaging: a Necessary Tool for Materials Science	117
Krzysztof Łukasiak, Krzysztof Przybyszewski	
Analysis of the Relationship between Probability of Crystal Destruction and Its Size for the Ultrafine Grinding Processes	125
Maciej Garbacz	
Path Planning Problem for Mobile Robot Using Proximity Sensors	135

Marcin Krupski, Agnieszka Siwocha, Andrzej Cader	
Abstract Fractal Interpolation in Computer Graphics – Utilization of a New Method	143
Agnieszka Siwocha, Marcin Krupski, Andrzej Cader	
The Concept of a Fractal Compression of Image	155
Witold Byrski, Jędrzej Byrski	
Finite Memory Algorithms for Exact State Reconstruction	167
Leszek Rutkowski	
Making Decision Using Fuzzy Sets of Type 2	181
 PROCESS TOMOGRAPHY	
Sławomir Lewandowski, Jarosław Włodarczyk	
Weight Matrix Generation for Image Reconstruction in Industrial Gamma-Ray Tomography	189
Volodymyr Mosorov, Dominik Sankowski, Rasif Mohd Zain	
A Dual Modality Reconstruction Algorithm for Optical and Electrical Capacitance Tomography	195
Jarosław Włodarczyk, Sławomir Lewandowski	
Analysis of the Noise Influence on the Quality of the Image Reconstruction in the Dual Modality Tomography	203
Paweł Sztuka, Krzysztof Grudzień, Andrzej Romanowski	
Software Package Dedicated to Tomographic Image Processing and Analysis	209
Robert Banasiak, Radosław Wajman, Łukasz Mazurkiewicz	
Sensor Evaluation for Three-Dimensional Capacitance Tomography	221
Mariusz R. Rząsa, Radosław Wajman	
The New Concept of Capacitance Tomography Sensor Design for Gas-Liquid Counterflow Investigation	229

Andrzej Romanowski, Krzysztof Grudzień	
Probabilistic Algorithms for Process Parameters Estimation	239

IMAGE PROCESSING FOR MEDICAL AND INDUSTRIAL APPLICATIONS

Zbigniew Rudnicki	
Image Sequence Analysis of Sliding Friction Traces of PTFE Composites	251
Adam Sędziwy	
Procedure of 2D Lattice Orientation	265
Roman Vorobel, Magdalena Stobińska	
Using Relative Contrast for Unsharp Masking	273
Krzysztof Strzecha, Anna Fabijańska, Dominik Sankowski	
Segmentation Algorithms for Industrial High-Temperature Image Analysis System	283
Jarosław Gocławski, Patryk Anioł	
The Segmentation Method of Plant Cells Nuclei Images in the Cytometry of DNA with Heterogenous Distribution Inside of a Nucleus	299
Marcin Kuzański, Dominik Sankowski	
The Algorithm of the Edge Detection in the Computer Application of the Assessment of Yarn Quality	313
Zbigniew Bubliński, Mirosław Jabłoński, Zbigniew Mikrut	
Analysis of Video Sequences in the VirtualDub Environment Based On FPGA Platform	323
Zbigniew Bubliński, Zbigniew Mikrut	
Efficiency of Selected Object Labelling Methods	335
Agnieszka Dąbrowska, Kazimierz Wiatr	
Modification of Motion Estimation Algorithm <i>E3SS</i> for Implementation in FPGA Chips	345

Marek Gorgoń, Piotr Pawlik, Jaromir Przybyło, Mirosław Jabłoński Modelling and Implementation of Videodetecting Algorithms on the FPGA Platform	355
Józef Jachimski, Sławomir Mikrut The Influence of JPEG Compression on Feature Extraction on Digital Images	365
Ernest Jamro, Kazimierz Wiatr Pipeline Image Processing Employing Embedded Development Kit and On-Chip Peripheral Bus	373
Marek Kwiatkowski, Mariusz Kołton, Paweł Russek, Kazimierz Wiatr Image Softprocessor with Reconfigurable Instruction Set	385
Jacek Nowakowski, Daniel Kaczorowski, Łukasz Tomczak Image Processing Algorithms Application for 3D Multi Phase Flow Model Reconstruction	395

IMAGE ANALYSIS AND RECOGNITION

Piotr Pawlik, Daniel Iwaniec, Michał Iwaniec Disabled Person-Computer Interface Based on Camera Image Analysis	399
Piotr Pawlik, Sławomir Mikrut Keypoints Searching for Matching Aerial Pictures	407
Jaromir Przybyło, Mirosław Jabłoński, Paweł Wołoszyn Marker Detection for Automatic Annotation of Facial Expression	413
Marek Zachara Fast Real Time Image Edges Vectorisation	427
Krzysztof Chrzanowski, Tomasz Raźniewski Automatic Evaluation Process of Image Intensifier Tubes Quality	435
Artur Sierszeń, Łukasz Sturgulewski Reference Set Condensation with Controlling the Compromise between the Speed and the Quality of Classification	447

Marcin Raniszewski	
The Lossy Image Compression with the Use of Linear Approximation	455
Łukasz Tomczak, Volodymyr Mosorov, Daniel Kaczorowski	
New Method of Texture Defect Detection in Automatic Visual Inspection	471
Jerzy Zalewicz	
Specification Technological Properties in Computer-Aided Measurement and Control	477
Marcin Bakała, Tomasz Koszmider	
Camera's Resolution Influence on Surface Tension Measurements Accuracy	485
Jacek Nowakowski	
Detection of Obstacles Motion in a Mobile Robot Environment	491

NEURAL NETWORKS

Marcin Kolibabka, Andrzej Cader	
The Method of Extorting Internal Patterns in the One-Way Classifying Neural Network	497
Joanna Grabska-Chrząstowska, Marian Fiedor, Kinga Tucholska	
Assessment of Kohonen's Networks' Performance on the Basis of an Opinion Survey among Students of the Academy of Physical Education in Cracow	503

BUSINESS INFORMATION SYSTEMS

Ryszard Tadeusiewicz	
E-Administration as a Source of New Scientific Challenges and Practical Applications for Automatic Control and Computer Science	513
Edyta Kucharska, Lidia Dutkiewicz	
Class of Heuristic Algorithms for Scheduling Problem on Machines with Retooling	531

Adam Niewiadomski	
Fuzzy Methods of Data Intelligent Interpretation	543
Paweł Skrzyński	
UML 2.0 in Modelling Relational Databases	559
Michał Turek	
Rule-Based Knowledge Approach For Polygon Mesh Siplification	571
Kamil Kuliberda, Jacek Wiślicki, Tomasz Kowalski, Piotr Błaszczuk, Grzegorz Balcerzak, Radosław Adamus	
Implemental Aspects of the Open Transport Platform Based on a Peer-to-Peer Architecture	579
Tomasz Serafiński	
Software Configuration Repository as Base for Advanced Software Development Process Solutions	591
Kamil Kuliberda, Jacek Wiślicki, Tomasz Kowalski, Piotr Błaszczuk, Grzegorz Balcerzak, Radosław Adamus	
Application of an Open Tranport Platform Based on Peer-to-Peer Technology for Communication and Integration of Object-Oriented Databases in the DataGrid Architecture	603
Bogusław Filipowicz, Joanna Kwiecień	
The Use of Queueing Network for the Performance Evaluation of Organizational Units	615
Grzegorz Sowa, Zbigniew Filutowicz	
Evolutional Content, Architecture and Form of Individual User Knowledge Presentation	623
OTHERS	
Krzysztof Przybyszewski	
Application of the Fuzzy Sets in Tests (Closed Problems) Evaluation	629
Michał Krupski, Andrzej Cader	
Influence of Distance Learning in Information Society Development	641
Style Sheet	654
