

Ayadi Aya and Hassine Maatoug
Topological sensitivity analysis for the narrow escape problem 441

Hugo Beirão da Veiga and Jiaqi Yang
A note on the development of singularities on solutions
to the Navier–Stokes equations
under supercritical forcing terms 475

Lucio Boccardo, J. Ignacio Tello, and Lourdes Tello
An elliptic system involving p -Laplacian and a chemotactic term 491

Steven G. Krantz
One complex variable versus several complex variables:
The Hartogs extension phenomenon in context 513

*Ganesh Purushothaman, Pandarinathan Nandakumar,
George E. Chatzarakis, and Ethiraju Thandapani*
Nonlinear hybrid second-order neutral delay differential equation
with mixed sign terms: oscillation via symmetry transform 521

Shupeí Shen and Xiaoming He
Normalized solutions for p -Kirchhoff equation with general nonlinearities
on bounded domain 541

Limin Zhang and Shuai Yuan
Ground states for the planar indefinite Choquard equation
with supercritical exponential growth 563
