

CONTENTS

<i>Józef Myjak</i> Professor Andrzej Lasota – a Biographical Note	343
 List of books, research papers and other publications of Professor Andrzej Lasota	353
<i>Józef Myjak</i> Andrzej Lasota’s selected results	363
<i>Wojciech Bartoszek</i> The work of Professor Andrzej Lasota on asymptotic stability and recent progress	395
<i>Piotr Rusek</i> Professor Andrzej Lasota’s theories in engineering	415
<i>Giuseppe Anichini, Giuseppe Conti</i> Existence of solutions of some quadratic integral equations	433
<i>Dobiesław Brydak, Bogdan Choczewski, Marek Czerni</i> Asymptotic properties of solutions of some iterative functional inequalities	441
<i>Antoni Leon Dawidowicz, Anna Poskrobko</i> On periodic and stable solutions of the Lasota equation in different phase spaces	453
<i>Gerald S. Goodman</i> Fractal sets satisfying the strong open set condition in complete metric spaces	463
<i>Gerald S. Goodman</i> Invariant measures whose supports possess the strong open set property	471
<i>Piotr Grabowski</i> The motion planning problem and exponential stabilization of a heavy chain. Part II	481
<i>Michał Kisielewicz</i> Some optimal control problem for partial differential inclusions	507
<i>Zygfryd Kominek</i> Remarks on the stability of some quadratic functional equations	517
	339

Janusz Matkowski

- Iteration groups, commuting functions and simultaneous systems
of linear functional equations 529

Jean Mawhin

- Reduction and continuation theorems for Brouwer degree and application
to nonlinear difference equations 541

Wacław Pielichowski

- Some remarks on the optimization of eigenvalue problems
involving the p -Laplacian 561

Marina Pireddu, Fabio Zanolin

- Chaotic dynamics in the Volterra predator-prey model
via linked twist maps 567

- Instruction for authors 593
