

<i>Shengbing Deng, Wenshan Luo, and César E. Torres Ledesma</i>	
Combined effects for a class of fractional variational inequalities . . . . .	119
<i>Josef Diblík</i>	
Representation of solutions of linear discrete systems with constant coefficients and with delays . . . . .	145
<i>Teresa W. Haynes and Michael A. Henning</i>	
Augmenting graphs to partition their vertices into a total dominating set and an independent dominating set . . . . .	179
<i>Gee-Choon Lau</i>	
Complete characterization of graphs with local total antimagic chromatic number 3 . . . . .	199
<i>Sergio Palafox and Luis O. Silva</i>	
Spectral analysis of infinite Marchenko–Slavin matrices . . . . .	227
<i>Patryk Sitko and Ivan Tsyfra</i>	
Extended symmetry of the Witten–Dijkgraaf–Verlinde–Verlinde equation of Monge–Ampere type . . . . .	251
<i>Yanyan Wang and Xiaojing Yang</i>	
Local properties of graphs that induce global cycle properties . . . . .	275
Instructions for authors . . . . .	287
