

Contents

Noureddine Maazi, Balahouane Lezzar An efficient Monte Carlo Potts method for the grain growth simulation of single-phase systems	85
Said Benlakhdar, Mohammed Rziza, Rachid Oulad Haj Thami A hybrid statistical approach for texture images classification based on scale invariant features and mixture gamma distribution	95
Evgeny L. Pankratov On the method of changing the temperature of liquids and gases in a transportation system by local heating or cooling	107
Mateusz Mojżeszko, Mohan Setty Numerical investigation of the influence of explosive welding process setup on the Ti/Cu interlayer morphology	113
Danuta Szeliga, Krzysztof Bzowski, Łukasz Rauch, Roman Kuziak, Maciej Pietrzyk Mean field and full field modelling of microstructure evolution and phase transformations during hot forming and cooling of low carbon steels	121
